**DETAILED ACTION**

1. The IDS of 6/23/01 was received and considered.
2. Claims 1-5 are pending.

***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim presents a method of generating a digital signature and checking the digital signature with no purpose or outcome and therefore represents merely the manipulation of abstract mathematical concepts. Claims 2-3 are rejected under similar rationale.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not sufficiently describe an "unchopped message". *For the purposes of this Office Action, the term "unchopped" is understood to mean "unhashed", where "hash" is defined as a one-way hash*

*function commonly used in cryptography and further used in the DSA signature algorithm.*

Claims 2-3 are rejected based on their dependence upon claim 1.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the limitation “relating to probabilistic digital signatures” is vague and indefinite.

Regarding claim 1, the limitation “using a probabilistic algorithm” is vague and indefinite.

Regarding claims 1 & 4, the limitations “for the signatory” and “for the checker” are unclear, as it is indefinite whether the verifier/checker is performing the action or whether the action is being performed for the verifier/checker.

Regarding claims 1 & 4, the terms “checker” and “checking” appear (in view of the specification) to mean “verifier” and “verifying”, respectively as they are commonly used in reference to digital signatures, however, applicant’s use of the terms “checker” and “checking”, rather than the standard terms suggests a different definition and hence their meaning is unclear. *For the purposes of this Office Action, the terms “checker” and “checking” are understood to mean “verifier” and “verifying”.*

Regarding claim 3, the limitation “the Schnorr algorithm” is unclear. It is unclear as to which algorithm this claim refers. *For the purposes of this Office Action, “the Schnorr algorithm” is understood to refer to the well-known Schnorr signature scheme, a variation of the ElGamal scheme.*

Regarding claim 4, the claim presents a device performing the functions of two entities. As the claim suggests that the two entities, the signatory and the checker, are distinct, they each require separate apparatus.

Regarding claim 4, the limitation “of the chip card type” is vague and indefinite.

Regarding claim 4, it is unclear whether the limitation “using a probabilistic algorithm” is referring to “a signature method” or “A protected device”.

9. Claims 2 & 5 are rejected based on their dependence on claims 1 & 4.
